Re: Minnesota Youth Treatment Center
Lino Lakes, Minnesota

Dear Sir:

With further reference to your communication of June 26, 1962, please note:

The County Board has at its last meeting granted a neighboring farmer, Mr. Robinson, permission to clean out and rehabilitate the outlet to County Ditch No. 10 according to the grades on the attached profile of the ditch which runs along the East side of the above installation.

It is impossible for the county to participate or cooperate any further in the County Ditch because there is no money in the ditch fund and it is impossible to get money into the ditch fund without a proper petition to the county board, which money in turn must be assessed back to the property.

Also please be assured that Anoka County will certainly do all that is practically possible to help, aid, and assist the Village of Lino Lakes with the access roads to this nice new facility being provided for the citizens of Minnesota.

Yours very truly,

E. J. Lundheim, P.E.
County Engineer
