Entered according to Act of Congress in the Year 1887, by Geo. J. Barnard & Co., St. Louis, in the office of the Librarian of Congress at Washington, D. C.

To the Board of County Commissioners of Carroll, Minn.

In compliance with your order dated the 5th day of January

A. D. 1898, appointing the undersigned Viewers to survey and locate a ditch, drain, or water course, with Mcnamoy Branch

described in the copy of the petition, accompanying said order. We do hereby respectfully report, that we did meet at the time and place specified in said order, to-wit: On the 15th day of

January A. D. 1898, at Carlisle Office in Mcatapeem with a Surveyor, who was a civil engineer preparatory to the

commencement of said work, and did make an accurate survey of said ditch, drain, or water course, and of Branch No 1 to 5 vicinity

from their respective sources to their outlets, as given in the Plat thereof, attached hereto, marked "Exhibit 'A,' of Ditch No. 29" and made a part

of this Report; and did cause stakes to be set along the line of said ditch, drain, or water course, and said Branch

said stakes numbered progressively down stream at each one hundred (100) feet; and we have in tabular form given the depth of cut of said ditch, drain, or water course, and of Each of said Branches at showing the

width at the bottom, width at the top at their respective sources and outlets and at each one hundred (100) foot stace thereof; and have made a computation of the number of cubic yards of earth to be excavated and removed from said ditch, and of said Branch

between each the one hundred (100) foot stakes, and the estimated cost per cubic yard for the removal thereof; and that we have correctly and accurately summed up the total number of cubic yards of earth to be excavated and removed for the entire length of said ditch, and of said Branch

and have made an estimate of the total cost of laying out, establishing and construction of the whole work, as shown in our report thereof, attached hereto and marked "Exhibit 'B,' of Ditch No. 29" and made a part of this Report.

We have also specified the time and manner in which the work shall be done, as shown in our report thereof, attached hereto, and marked "Exhibit 'C,' of Ditch No. 29" and made a part of this Report.

We have filed with this Report an account of the names of the laborers and the time each was employed by us, and every other item of expense by us incurred in and about said work, which said account is marked "Exhibit 'D:' of Ditch No. 29" attached hereto. *Which also show Estimates of other expenses.*

And we have given in tabular form the names of the owners of each tract of land, to be benefited or damaged, the description of each tract benefited or damaged, (said names of owners and descriptions being the same as appears on the County Tax duplicates of said County of *Coconino Arizona* Minn.), and the total number of acres in each of said tracts, the estimated number of acres in each of said tracts of land to be benefited or damaged (as the case may be), and the amount that each tract of land will be benefited or damaged by the construction of said work. *And Mr. Swan also made an estimate of the benefits to certain tracts adjacent to the construction of said ditch & branches*

and also the total estimated benefits *to said lands & tracts* as shown in our report thereof, attached hereto and marked "Exhibit 'E:' of Ditch No. 29" and made a part of this Report *to be namely show amount \$23000 Dollars*

And we would respectfully report that in our opinion the estimated expense of the construction of such ditch *in branches* including the damages awarded therefor

are less than the utility of the proposed ditch branches
And we also report that the construction of the said ditch & branches will be of public utility & benefit great benefit to the public health Commission and others
