Re: Anoka County Ditch #41

Dear Sir:

With reference to the culvert at Sta. 209+57 under Truck Highway #65. It is the opinion of the division that a culvert should be placed on the same grade as the new ditch, even though there is a sufficiently large culvert approximately $1\frac{1}{2}$ feet above the flow line of the proposed new ditch. The capacity of this new culvert is not as important as getting it down to the flow line of the proposed ditch.

Very truly yours,

Walter S. Olson, Director
