Re: Ditch # 41 - Sand Creek Alignment (301-001B)

Dear Mr. Anderson:

Enclosed is a copy of the proposed alignment for Ditch #41.

We have attempted to plot the original alignment as described in field notes. We have found that the notes are seriously in error. In an attempt to forstall platting by Developers to a meandering ditch, we have prepared the alignment as shown.

Let me know your thoughts and concerns.

Yours Truly,

  
Harold G. Israelson, P.E.

Re: Ditch #41 - Sand Creek Alignment (301-001B)

Dear Harold,

The copies of the alignment of County Ditch #41 (Sand Creek) have been reviewed by both myself and Paul Ruud, our County Engineer, and we find that it is a definite improvement over the alignment as shown on the plan of County Ditch #41 in our files. Paul indicated delight that the proposed alignment on the sheets that you sent me would be farther away in one place to the County State Aid Highway #11.

I presume that the work that you are doing is preliminary to the reconstruction or repair of the ditch and thus legalizing the description of the alignment. We have no concerns about the proposed alignment and we do commend you for your efforts.

Yours truly,

Roland W. Anderson  
Anoka County Surveyor
