A true copy of said petition is as follows, to-wit:

I, the Board of County Commissioners of the County of Anoka, State of Minnesota, will be liable to be attacked by or assessed for the expense of the construction of the public ditch and branches hereinafter described, would respectfully represent that the public health, convenience and welfare require the establishment and construction of a public ditch and branches along the following described route in the Town of Columbus in said county of Anoka, and that the benefit and utility, and is necessary for the following reasons, to-wit: That large acres of land along the course of the proposed ditch and branches are now wet, overflowed and rendered useless and of small value for farming or other purposes, which by the establishment and construction of the proposed ditch and branches would be drained, improved and rendered useful and of great value for farming and other purposes, and the public health would be improved by the removal of large quantities of stagnant water along the course of the proposed ditch and branches.

A general description of the proposed starting point and terminus of said ditch is as follows:

Commencing at the lowest point in marsh near the center of the sec 27, the NW 1/4 of section 16, township 32, range 22, thence running along said sec 27, along the south westerly cross said sec 27 of the NW 1/4 of said section 16, and across the NW 1/4 of the SW 1/4 of the NW 1/4 of said section 16, and southerly across the west half of the sec 27 of said section 16 and southeasterly across the northeast quarter of section 21, said town and range, and easterly across the northwest quarter of section 22, said town and range, to Columbus Lake, so-called, and through said Columbus Lake to its outlet, and following generally the course of the outlet creek of said Columbus Lake, to Kroe Creek in section twenty-three, said town and range, and terminating in said Kroe Creek in said section as its outlet. Also such drains or branches as may be necessary and proper to render said ditch most useful, efficient and beneficial.
