

above described work on or before the day
ofA. D. 19....

And It Is Further Agreed, That the said party of the second part will furnish all materials, tools, labor and appliances necessary for the construction of the said work in the manner and with the time as set forth in this agreement.

And It Is Further Agreed, That the time shall be the essence of this agreement and should the said party of the second part fail to complete the work, as hereinbefore described, in the manner herein described or within the time as herein set forth or according to the terms of this agreement; then the said party of the second part shall forfeit to the said County of Anoka the sum ofDollars for each and every day that the said work remains in an unfinished condition after the time above specified.

Terms.

The term "County Commissioners" wherever used in this agreement is intended to designate a majority of the members of the Board of County Commissioners of the County of Anoka in the State of Minnesota.

The term "Contractor" wherever used in this agreement is intended to designate the party or parties who may contract with the County of Anoka for the construction of any part of this work.

The term "Engineer" wherever used in this agreement is intended to designate the civil engineer who has been appointed by the County Commissioners for the survey and superintendance of this work.

The Plans, reports, specifications and the general Laws of the State of Minnesota relative to the construction of public ditches must be considered as a part of this agreement and shall be considered in submitting bids on this work and for the construction of the same.
Specifications.

General Description. This work shall consist of furnishing all materials, tools, labor and appliances and building complete

in every detail ofDitch No.....of Anoka County to the satisfaction of the County Commissioners and the engineer and in compliance with the plans and reports of said ditch on file and of record in the office of the Auditor of the said Anoka County, and these specifications.

Time. Work shall commence on or before the of19.... and shall be pushed with due diligence until its completion, which completion shall occur before the day ofA. D. 19.....

Clearing and Grubbing. The contractor shall clear the route of the ditch from all trees, underbrush, roots and stumps, to a width of three (3) feet on each side at the top of the finished ditch and its branches. Such trees, underbrush etc., to be removed and piled outside of the earth taken from the prism of the ditch and its branches, and it shall be and remain the property of the owner of the land on which said trees, etc., are found.

Opening. Where the ditch is designated to be an open ditch, the top shall be opened sufficiently wide to secure a completed ditch of the required width, even though, the opening has to be made wider than the width stated in the report of the engineer.

Along Road. Where an open ditch follows parallel and within four (4) rods of the center line of a traveled or legally established road the material that is taken from the ditch shall be distributed to a uniform depth on the center line of the said road and to a width of not less than six (6) feet from the center on either side, so as to form a turn-pike along the center line of the said road and to a length equal to the length of a ditch along the highway.

Material Deposited. The material will be removed from the prism of the ditch and be deposited on either side in a compact pile along the route of the ditch as circumstances will admit, unless the ditch crosses a traveled or legally established road, or is otherwise specified by the engineer.

Crosses Where the line of the ditch crosses a traveled or Road. legally established road, the material from the ditch will be deposited in such a manner as the engineer may direct.

Berm. No earth or other material shall be left on the side of the ditch within Two (2) feet of either side of the completed ditch. This space of Two (2) feet shall be when the ditch is completed, free from earth of any material or roots or stumps.

Surface. At each One Hundred (100) foot station an opening will be made in the bank of the material taken from the ditch and a shallow ditch at least Six (6) inches deep and One (1) foot wide will be dug from the natural surface of all marshes to the ditch itself in order to allow all surface water to reach the ditch.

Old Whenever a bank of this ditch runs within Twenty (20) Foot or less of a bank of any old ditch, the material from the new ditch shall be deposited in the old ditch until sufficient earth has been deposited therein to completely fill the same.

Bridges. The bridging of the roads where the(ditch) ditch crosses a road will be done by the Board of Supervisors of the town in which the crossing is situated, unless otherwise designated and will be built in accordance with the plans in said Engineer's report.

Staking. The ditch and its branches has been staked by placing numbered stakes at each One Hundred (100) foot and by placing a larger pole where the line of the ditches changes. These stakes are on the center line of the proposed ditch and its branches and should be closely followed in the construction of the same.

Excavation. The ditch and its branches will be excavated to the depth, the width on top, the width on the bottom and have have the banks of the slope as given and set forth in the report of the engineer on file in the office of the Auditor

of the County of Anoka. The bottom between each One Hundred (100) foot station will be made smooth and straight and the banks shall have a uniform slope of One (1) to One (1) between each of said points.

Levels have been taken at the uneven points between the One Hundred (100) foot stations and quantities estimated for such unevenness so that the contractor will receive payment for each cubic yard of material removed.

Open Ditches. The general form of the open ditches shall be of the required width on top, of the required depth and having the side slopes of One (1) to One (1). Between stations the ditch shall have the same slope of the sides and shall be of sufficient width on top to secure that slope.

And It Is Further Agreed, That as the work progresses, the engineer may alter or change the plans, specifications, or the manner of conducting the work but it is agreed that no change will be made so that it will increase the cost of the work above Ten (10) per centum of the total original contract price. Any change so made will be done only on the written instructions of the engineer.

And It Is Further Agreed, That the payments will be made by the said party of the first part by orders drawn on the treasurer of the County of Anoka in the manner and at the time as established by the Laws of the State of Minnesota relative to the drainage of lands by the Counties of the said State.

In Witness Whereof, the said parties to this agreement have hereunto set their hands and seals the day and year first written.
