CONSTRUCTION NOTES

THE 1983 EDITION OF THE MINNESOTA DEPARTMENT OF TRANSPORTATION "STANDARD SPECIFICATIONS FOR CONSTRUCTION" SHALL GOVERN.

BRIDGE SEAT REINFORCEMENT SHALL BE PLACED TO AVOID INTERFERENCE WITH DRILLING HOLES FOR ANCHOR RODS. THE SUPERSTRUCTURE GIRDERS SHALL BE ERECTED IN FINAL POSITION PRIOR TO DRILLING HOLES FOR AND PLACING ANCHOR RODS.

THE FIRST DIGIT OR THE FIRST TWO DIGITS OF EACH BAR MARK INDICATE THE BAR SIZE. BARS MARKED WITH THE SUFFIX "E" SHALL BE EPOXY COATED

DESIGN DATA (WIDENING)

1977 & INTERIM A.A.S.H.T.O. DESIGN SPECIFICATIONS LOAD FACTOR DESIGN METHOD - H-S20 LOADING.
REINFORCED CONCRETE:
f'c = 4000 P.S.I. n = 8
fy = 60 000 P.S.I. REINFORCEMENT
STRUCTURAL STEEL:
fy = 36 000 P.S.I. SPEC. 3306
fy = 50 000 P.S.I. SPEC. 3309

APPROX. DECK AREA = 20640 SQ. FT.
PROJECTED A.D.T. FOR 2005 = 8071

NOTES

NO CUTTING WILL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER. REMOVAL AND RECONSTRUCTION SHALL CONFORM TO SPEC. 2433.

ALL ELEVATIONS AND DIMENSION SHALL BE VERIFIED BY THE CONTRACTOR IN THE FIELD.

ALL STRUCTURAL STEEL SHALL BE PAINTED PER SPEC. 2477.

REMOVE GLAND FROM EXISTING EXPANSION DEVICE AND REPLACE IN RECONSTRUCTED EXP DEVICE IN ONE LENGTH. (SEE SPECIAL PROVS.)

SPECIAL SURFACE FINISH ON ALL NEW AND EXISTING CONCRETE.

PAINT ABUTMENT BRIDGE SEAT WITH EPOXY.

GENERAL NOTES

Concrete in railbase and end posts shall be mix No. 3X46

For materials, galvanizing and workmanship see special provisions.

Railpost spacing is measured horizontally along top of rail base.

Place metal railposts and anchorages normal to grade.

For railpost spacing, joints in railing and reinforcement details see superstructure sheet.

Place the R511E end post stirrups when the No. 11 vertical bars are cast in the abutment.

Finish edges of concrete rail base and end post to a 1/2" V except where noted. Holes for expanding place nuts in rail pipe may be drilled in the field.

All material in concrete rail base and concrete end posts except railpost anchorages, is included in superstructure quantities. Guardrail connection to be included in price bid for other items.

Length of concrete and pipe railing for payment is measured between outside faces of concrete end posts.

Price bid for pipe railing includes the railpost anchorage and all material above top of rail base.

SECTION D - D

100% BUTT WELDED PILE SPLICE

NOTES:

A. W. S. Type E7016 or E7018 (low-hydrogen) electrodes shall be used for 100% butt welded splices.

A. W. S. Type E6010, E6011 electrodes, or E7016 or E7018 (low-hydrogen) electrodes, shall be used for the alternate plate type pile splice.

Low-hydrogen electrodes shall be supplied in hermetically (air-tight) sealed containers.

Low-hydrogen electrodes shall be stored in holding ovens at a temperature of not less than 250° F.

Low-hydrogen electrodes shall be placed in a holding oven for at least 8 hours, after having been exposed to the atmosphere for more than 2 hours.

Any type electrode which has become wet, soiled, or damaged shall not be used.

Welding shall not be done when the ambient temperature is lower than 0° F. or when the pile is wet or exposed to falling rain or snow. When the pile metal temperature is below 32° F., the pile metal in the area of the weld shall be heated to a minimum temperature of 70° F. and maintained at this temperature during welding.

NOTES:

For elastomeric materials and pad construction, see Spec. 3741 and special provisions, except as noted.

All steel plates & anchor rods shall comply with Spec. 3306, except as noted.

All plates shall be flat after fabrication and galvanizing.

Pintles shall comply with Spec. 3314, Type II

Galvanize structural steel bearing assembly after fabrication per Spec. 3394, except as noted.

Payment for bearing assembly shall include all material on this detail, except the Sole Plate.

(1) The radius of the curved plate shall be 1' 0" min. and 1' 6" max. Finish to 250 Micro. The finished thickness of the plate may be 1/16" less than shown.

(2) See Bridge Design Manual for design requirements.

(3) 5/16" min. fillet weld for 3/4" up to & including 1-1/2" thick sole plates. 3/8" min. fillet weld for over 1-1/2" to 2-1/4" thick sole plates, except as noted in the plans.

(4) Sole plate may be tapered. See superstructure details.

(5) When the sole plate is tapered, dimension "J" is the minimum thickness of the plate.

For elastomeric materials and pad construction, see Spec. 3741 and special provisions, except as noted.

All steel plates shall comply with Spec. 3306, except as noted.

All plates shall be flat after fabrication and galvanizing.

Pintles shall comply with Spec. 3314, Type II

Galvanize structural steel bearing assembly after fabrication per Spec. 3394, except as noted.

Payment for bearing assembly shall include all material on this detail, except the Sole Plate.

① The radius of the curved plate shall be 1' 0" min. and 1' 6" max. Finish to 250 Micro. The finished thickness of the plate may be 1/16" less than shown.

② Do not galvanize these plates.

③ The total thickness shown includes the steel plates.

④ See Bridge Design Manual for design requirements.

⑤ 5/16" min. fillet weld for 3/4" up to & including 1-1/2" thick sole plates. 3/8" min. fillet weld for over 1-1/2" to 2-1/4" thick sole plates, except as noted in the plans.

⑥ Sole plate may be tapered. See superstructure details.

⑦ When sole plate is tapered, dimension "J" is min. thickness of plate.

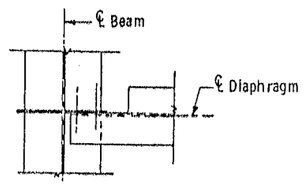
TYPICAL DETAIL AT BEARINGS



SECTION C-C

NOTES

1. Use 7/8" high strength bolts or 7/8" pin bolts
2. For flange material over 1-1/2" thick, use 3/8" weld.
3. Where expansion device is bolted to end diaphragm, use W12 x 53 (for 21" to 24" beams), W14 x 61 (for 27" to 33" beams) and W16 x 71 (for 36" to 42" beams). For beam heights over 42", see framing plan for size of diaphragm.
4. For beam heights over 42", diaphragm to be at least 1/3 the beam height.

BRACKET DETAIL

NOTES

All steel plates per Spec. 3306. Fabricate grate using automatically controlled cutting torch.
Malleable iron grate alternate per Spec. 3324 Grade 35018.
Workmanship and fabrication per Spec. 2471.
Blast clean scupper and grate after fabrication.
Galvanize scupper and grate per Spec. 3394.
Galvanize hardware per Spec. 3392.
Install grate with arrow on curb side and in direction of flow.
Payment for Floor Drain, Type 1 shall include all material shown on this detail.
Grate opening area 110 sq. in.

FOLLOW SEPARATE "INSTRUCTIONS FOR PREPARATION OF BRIDGE SURVEYS" WHEN MAKING BRIDGE SURVEYS.

DATA

1. Preliminary recommendations of Engineer in charge of Bridge Survey:
   - *a.* Net span length and type of bridge....85'-106'6"-106'6"-85'
   - *b.* Width of roadway on bridge....30' - WIDEN TO 44'-0"
   - *c.* Number and width of sidewalks, if any....2-2'0" WIDE WALKS - 1-6'-0" NO. SIDE
   - *d.* Locate center of bridge at station....STA. 13+35.00
   - *e.* If a skew bridge is recommended, the angle of skew should be....NONE
   - *f.* Is piling required?....YES
2. Special features: Waterfalls, dams, exceptional floods, ice, driftwood, sliding banks, logging, etc.
3. Changes: In height or length from that of old bridge, and reasons why....

DATA (Contd.)

4. Other bridges in vicinity:
   - *a.* Over same stream (particularly structures which carry high water without overflow of roadway); give location, length, height above water, net cross-sectional area at high water stage and estimated age....
   - *b.* Over or under same highway or railroad; give location, length, horizontal and vertical clearances and estimated age....NOT APPLICABLE
   - *c.* Reasons why these bridges are, or are not, fair indications of what length the proposed bridge should be....
5. If structure is over a drainage ditch, is ditch gradient liable to be altered?....NO
6. Navigation clearances required, if any....NONE
7. Information and evidence in regard to high water stages was obtained as follows....
8. Must contractor provide for traffic during construction of proposed bridge?....NO
   If so by what means?....SEE SPECIAL PROVISIONS

HIGH AND LOW WATER ELEVATIONS

Data obtained from....LOCAL RESIDENTS.... reflects highest water elevation in the area of this construction to be....890.60....and the lowest water elevation to be....DRY.... The above figures are for informational purposes only. The state neither warrants nor represents that these figures for high water and low water are in any way indicative of the high water or low water to be expected or encountered during this construction.

SHIPPING POINT

Proposed Bridge is....14....miles....NORTH....of
*....ANOKA....which is the nearest Railroad shipping point.
