Annual crash cost = \$145,000

Statewide comparison = Signal, Low Volume (<=20K)

Total Crash Rate	
Observed	0.386
Statewide Average	0.548
Critical Rate	0.940
Critical Index	0.41

Fatal & Serious Injury Crash Rate	
Observed	0.000
Statewide Average	1.024
Critical Rate	5.510
Critical Index	0.00

The observed crash rate is the number of crashes per million entering vehicles (MEV). The critical rate is a statistical comparison based on similar intersections statewide. An observed crash rate greater than the critical rate indicates that the intersection operates outside the expected, normal range. The critical index reports the magnitude of this difference (i.e. observed crash rate ÷ critical crash rate).

The observed total crash rate for this period is 0.39 per MEV; this is 59% below the critical rate. Based on similar statewide intersections, an additional 15 crashes over the five years would indicate this intersection operates outside the normal range.

The observed fatal and serious injury crash rate for this period is 0.00 per 100 MEV; this is 100% below the critical rate. The intersection operates within the normal range.
